

Intern Onboarding & Company Handbook

Everything a new Focus Realm intern needs to know — the company, the people, both products, how we sell, how we work, and how we talk about ourselves.

"Every shift, five-star." · "Replacing Complexity with Clarity"

BEFORE YOU START

This handbook blends current, active positioning with a small amount of clearly-marked historical context (earlier versions of the product and pitch). Wherever you see a **"Legacy"** box, treat it as background only — never as something to say to a client today. If anything here looks out of date, ask Sehej or Ali rather than guessing.

Welcome to Focus Realm

However you found your way here — Marketing, Business Development, or the Founder's Office — this handbook is your single source of truth for your first weeks.

We're a small, fast-moving team building two real products for two real industries. There's no large onboarding department and no six-week ramp-up — you'll be useful within days, which means you need real context fast. That's what this document is for.

What this handbook covers

By the end of this document you will understand:

- What Focus Realm actually is, and the philosophy that shapes every product decision we make
- Who founded the company and what each of them owns day to day
- Both of our product lines — **Focus Realm Hospitality** and **Focus Realm Education** — in real depth, including the exact language we use and avoid
- Who we sell to, how we sell, and the partners who help us do it
- The brand system, working culture, and internal tools you'll be using

How to use it

WEEK ONE

Read it start to finish, in order. Sections build on each other — the philosophy in Section 03 explains almost every product decision that follows it.

AFTER THAT

Treat it as a reference. The Glossary (Section 15) and Quick Reference (Section 16) are built for fast lookups once you're already working.

ONE RULE BEFORE ANYTHING ELSE

Section 11 covers our external partner ecosystem and is marked confidential. It exists so you understand how the company actually operates — it is **never** to be repeated to a client, prospect, journalist, or anyone outside the company. If you're ever unsure whether something is safe to share externally, don't share it — ask first.

SECTION 02

02 Company at a Glance

The essential facts — who we are, what stage we're at, and what we call ourselves.

Company name	Focus Realm
What we are	A learning and operations technology company building two distinct products — one for the hospitality industry, one for education .
Core identity	A Learning Technology Partner — explicitly not a traditional LMS vendor.
Website	www.focusrealm.org (older materials may still reference focus-realm.com)
Contact email	admin@focusrealm.org
Phone	+91 93221 07991
Headquarters	Pune, Maharashtra, India
Current tagline (Hospitality)	"Every shift, five-star."
Company tagline	"Replacing Complexity with Clarity"
Business stage	Pivotal growth stage. Pre-revenue on the hospitality product, actively pursuing our first paying customer.

THE GOAL ON EVERYONE'S MIND RIGHT NOW

Focus Realm's target is to land its **first paying customer and first revenue before the end of 2026**. Every workstream — product, sales, content, partnerships — ladders up to that one milestone.

Who's involved in growing the company right now

Beyond the three founders (Section 05), Focus Realm runs on a lean mix of founder-led execution and outsourced sales/dev partners (Section 11), plus a small, growing bench of interns across **Marketing**, **Business Development**, and the **Founder's Office** — recruited in part through placement programs at leading Indian universities. If you're one of them, welcome — you're joining at a genuinely early, high-leverage moment.

The problem, in one paragraph

Hotels and schools both run on standards that live on paper — SOP binders, training folders, WhatsApp groups — while the actual work happens somewhere else entirely. Nobody can prove the standard was followed, so quality drifts, audits become fire drills, and good staff leave because nobody invested in them properly. Focus Realm builds the software layer that closes that gap, tailored separately for each industry.

03 Our Philosophy: Strategic Minimalism

This is the single idea that explains almost every product and positioning decision in this handbook.

The problem we believe exists

Traditional Learning Management Systems suffer from what we call **"Feature Dumping."** Generic LMS platforms ship with enormous feature sets — up to **80% of which go unused** by any given customer. The result is a cluttered, confusing product that nobody fully adopts, and an ROI that never materializes.

Our answer

"Strategic Minimalism." We build clean, intuitive, tailored platforms that contain only what the client actually needs to operate — nothing more. We don't sell a generic box; we sell a customized operational backbone, white-labeled and built to feel native to the client's own organization.

"Subtraction-first design: build only what's in the intersection of committed features and design exploration — never the full superset." — Aditya Mishra, CTO

This same instinct shows up in how the company itself operates. Focus Realm's internal team stays tightly focused on **technical product development, implementation, and delivery** — building the product perfectly once a sale is made. Go-to-market, lead generation, and deal-closing are deliberately kept separate, run by dedicated external partners (see Section 11), so the core team never has to split its attention.

WHY THIS MATTERS FOR YOU

Whatever you're working on — a piece of content, a lead list, a deck — ask "what's the minimum version of this that actually does the job?" before you ask "what else could I add?" It's the house instinct, not just a product rule.

Two verticals, two vocabularies

Focus Realm operates in two markets with genuinely different products, buyers, and language. **Education is legitimately LMS-adjacent** — that framing is accurate and fine there. **Hospitality is explicitly not an LMS** at any level of positioning — that's a hard rule, not a style preference, covered in full in Section 06. The two verticals' language must never cross-contaminate in anything client-facing.

SECTION 04

04 One Company, Two Verticals

A single philosophy, expressed as two separate products for two separate industries.

Both products are built on Google Cloud / Firebase infrastructure, chosen for cost efficiency at scale — near-zero data streaming and storage costs, using free tiers and cloud credits — and for agility: core features can typically be developed and deployed in **1 to 10 days** by the tech lead. Both are fully web-based, requiring no high-end hardware and running efficiently on standard browsers and mobile data.

Which one will you work on?

Most interns will touch both at some point, but content, outreach, and positioning work should always be clearly scoped to **one vertical at a time**. If you're not sure which hat you're wearing on a given task, ask before you draft anything — the two products are pitched to genuinely different people with genuinely different pain points, and mixing them up undermines both pitches at once.

SECTION 05

05 Leadership Team

Three co-founders, three clearly split remits.

Sehej Sharma

CO-FOUNDER & CHIEF EXECUTIVE OFFICER

Sehej is the signatory on Focus Realm's founding agreements and leads the company's overall direction, its go-to-market posture, and its external partnerships — including the relationship with Legion (Section 11). He sets the tone for how the company communicates: conviction-led, data-backed, and allergic to hedged language. If you're producing content or outreach, his working style — fast, directive, expecting a strong first draft rather than a rough one — is the standard to write to.

LinkedIn: [linkedin.com/in/sehej-sharma-5b2151234](https://www.linkedin.com/in/sehej-sharma-5b2151234)

Ali Electricwala

CO-FOUNDER & CHIEF OPERATING OFFICER

Ali runs operations and marketing execution — from the PR and media outreach pipeline to content strategy to hiring and managing interns. If you're an intern reading this, there's a good chance Ali is your direct point of contact day to day. His standard for output is comprehensive and realistic over impressive-looking but shallow, and he expects self-directed work: the ability to operate without daily direction is treated as a hard requirement, not a nice-to-have, for anyone joining the team.

LinkedIn: [linkedin.com/in/ali-electricwala-190821261](https://www.linkedin.com/in/ali-electricwala-190821261)

Aditya Mishra

CO-FOUNDER & CHIEF TECHNOLOGY OFFICER

Aditya owns the product and engineering side end to end, and is the author of the company's "subtraction-first" design philosophy described in Section 03. He is the sole technical lead capable of shipping core features in days rather than weeks, and is the authorized signatory on Focus Realm's side of the TDC partnership (Section 11).

LinkedIn: [linkedin.com/in/iadityam](https://www.linkedin.com/in/iadityam)

A NOTE ON THIS SECTION

These profiles describe what each founder owns at Focus Realm, not their full personal or professional history — for that, their LinkedIn profiles (linked above) are the right place to look.

SECTION 06

06 Product Line A — Focus Realm Hospitality

Our primary active product. Read this section slowly — the naming and language rules here are non-negotiable.

READ THIS FIRST — NAMING RULES

The product's working prototype was internally codenamed "**Mise**." That name is retired — never use it as the company or product name, in any context, going forward. The real product name is **Focus Realm Hospitality**, working category name "**Service Execution Platform**" — described internally as "the operating system for hotel service standards." **This product is explicitly not an LMS** — the older "Hotels LMS / Hospitality Suite" framing is fully retired. Not a style choice — a hard rule.

The core product thesis

Everything the product does traces back to one idea: the SOP lives *inside* the timed task, not in a separate document. Completing the task generates photo and supervisor evidence. That evidence becomes an audit-ready service record. This is the entire spine of the product — not training-content delivery, but **real-time service execution with built-in proof**.

The live prototype

Explore it yourself: <https://fr2-b6s.pages.dev/> — 27 routes across three role interfaces, demoed against a fictional property, **Aurora Grand Colombo** (Sri Lanka, 468 rooms, 42 staff). The three-role architecture was confirmed "on point" and a "go to sell" by our GTM advisor Gaurav Vyas on 26 July 2026.

DEMO PERSONAS YOU'LL SEE IN THE PROTOTYPE

Maya Fernando (Staff) · Elena Rossi (Ops Manager) · Amina Rahman (Standards Author) · Arjun Rao (Duty Manager) · Jonas Lee (Incoming Shift)

The six-pain narrative — our locked GTM spine

This is the fixed narrative structure for all hospitality positioning and content. Each pain causes and compounds the next, with Audit Ambush as the inevitable conclusion if nothing changes. Use these exact names — don't rename or paraphrase them.

The Six-Pain Narrative — each pain causes and compounds the next

Language discipline — say this, not that

At the level of category positioning — how we describe what the product is — the following vocabulary rules are absolute:

USE

standards · operating briefs · timed tasks · evidence · service record · readiness

AVOID AT POSITIONING LEVEL

course · module · learner · training platform · LMS

"Courses" and "Modules" remain fine as in-product screen labels — just not as the words you use to describe the category to a prospect.

Locked product decisions

- Proceed to development and first customers.
- **No PMS (Property Management System) integration at this stage** — a deliberate foot-in-door strategy to stay independent and reduce sales friction.
- The committed feature list is a deliberate **subset** of the broader design-exploration superset — subtraction-first, per Section 03.

Still being decided

- Manual vs. automated task assignment — the long-term vision is a fully automated "like clockwork" auto-assign and auto-alert system.
- Whether step-level "Why it matters" copy earns its place in the product.
- How to track which operating briefs actually improve real work outcomes.
- Room/floor allotment logic — currently manual and WhatsApp-driven in real hotels; not yet solved in-product.

LEGACY CONTEXT — FOR BACKGROUND ONLY

Earlier versions of this product were built and pitched as a straightforward LMS: department/trainer/trainee management, a content library with read receipts, four role portals (Employee, Department Head, Trainer, HR Admin), course catalogs, certifications, and compliance dashboards. The **Clarks Hotels & Resorts** proposal (18 June 2025) was built entirely on this older framing, with per-user pricing and a 5-phase rollout that explicitly promised PMS/HRMS/biometric integration — which directly conflicts with our current no-PMS decision. Treat this as history, not something to quote today. The underlying training-content structure (an 8-level general training plan, 90-day departmental learning paths for Front Office, F&B, Housekeeping, and Internal Ops) may still be reusable as "Career Journeys" content, independent of the retired commercial model.

07 Product Line B — Focus Realm Education

Our second vertical — targeting universities, colleges, and schools with an AI-driven, gamified learning platform.

POSITIONING NOTE

Unlike hospitality, this product **legitimately is LMS-adjacent** — the no-LMS rule from Section 06 applies to hospitality only. Education and hospitality language must never bleed into each other in client-facing materials.

Product architecture — a three-part ecosystem

3. The Employability Layer

Future-ready integration, powered by global partner libraries (e.g. Alison)
5,000+ dual-certification courses (AI, Python, Soft Skills) + Skill-Tracker Dashboard

2. Micro-Services — The Innovation Layer

Optional, plug-and-play modules:

- AI Analytics Engine
- Gamification Engine
- Dynamic Timetable
- Faculty Development Module
- Parent Portal
- Goal Setting Tools

1. The Core Academic Hub — The Foundation

Course & content management · Assignment & grading
Smart attendance · Centralized notices

The Plugins Marketplace

Beyond the three core layers, we're building a collaboration-based marketplace of third-party learning services — advanced or targeted lessons, new languages, personality development, and more. These services aren't owned by Focus Realm and are charged separately, but they're surfaced through our trusted platform, giving schools an **additional revenue stream** on every purchase while giving every student and parent a way to discover and pursue interests beyond the syllabus.

Who we sell to, and why they struggle

TARGET BUYERS

Deans, Directors, Boards of Management, Principals

SALES MOTION

Slower cycle than hospitality, higher barrier to entry (legacy system lock-in) — but high volume potential

Pain points: disengaged students, administrative overload (grading and attendance eating into teaching time), outdated teaching methods, no data-driven insight into the student journey, and a real employability skill gap between what's taught and what recruiters need.

Why is education boring? Our research narrative

We built a researched positioning narrative around a simple two-part question: why is Indian education currently boring, and how can Focus Realm make it fun? The stats below are treated as real and sourced — consistent with our house rule of preferring defensible data over invented figures.

55%

of Indian teachers report high burnout, spending ~40% of their day on non-teaching admin work

87.9%

of surveyed Indian students describe their curriculum as "outdated"

73%

of Indian 13–17 year-olds report "high" academic stress

67%

of Indian students feel "disengaged" when pacing ignores their individual readiness

40%

increase in long-term retention linked to gamified feedback

63%

higher satisfaction linked to giving students agency over their own pace

Our response to each of these, in the product

- **Admin automation** — reclaiming 15–20 hours a month for teachers by automating attendance and homework tracking
- **An integrated gamification engine** built around school-wide narratives — XP for attendance, participation, and peer support, not just test scores
- **The "Beyond Classroom" hub** — 5,000+ courses students can "side-quest" into: AI, finance, deep tech
- **Adaptive learning paths** that adjust task difficulty to real-time performance
- **Progress tracking, not just grades** — a live progress bar in place of the traditional report card
- **NEP 2020 alignment** — data-backed proof of the "holistic development" schools already claim but rarely deliver

LEGACY CONTEXT — FOR BACKGROUND ONLY

An earlier, more generic pitch deck described the whole company as a single "AI-powered, gamified LMS for schools integrating with interactive boards" — an education-only framing that predates today's two-vertical structure. That deck's figures (global LMS market at \$47.47B by 2030, India EdTech to \$30B, ₹100/student/year pricing) are illustrative history, not verified current numbers — don't quote them as current without checking first. **The Hosteller** was referenced as a market-validation client in this era of materials.

08 Ideal Customer Profiles

Who we're actually looking for, in each vertical — the accounts worth spending time on.

Hospitality ICP

Target buyers	HR Directors, General Managers, Learning & Development Heads
Why hospitality first	Faster sales cycles, higher tech-adaptability, recurring business potential, and a genuine compliance need
Pain points	High staff turnover, failed health/safety audits, chaotic manual tracking (Excel sheets) for compliance, and the ineffective "spray and pray" method of generic staff training

Education ICP — the profile we chase hardest

Demographics

- **Location:** Tier 3 cities
- **Structure:** Multi-branch trust or group
- **Volume:** High — 5,000+ students
- **Type:** Budget private schools or state board institutes
- **Current tech:** Zero. Paper, Excel, WhatsApp groups. Never used an LMS.

Pain points

- **Marketing FOMO:** losing students to "International Schools" for lacking a "Smart School" tag
- **Tech phobia:** teachers are 40+ and scared of technology — more than 2 clicks and they'll refuse to use it
- **Data chaos:** managing 5,000 students on paper is a nightmare for the admin office

What this buyer actually needs

Complexity level: extremely low. One-click digital attendance, fee reminders sent via WhatsApp/SMS, digital report cards, and — critically — it has to work on low-end Android phones over 3G/4G.

OUR PITCH ANGLE FOR THIS BUYER

"Don't buy software. Buy a digital identity." The hook: *"Sir, we turn your school into a 'Smart Campus' in 48 hours without confusing your teachers. It's as easy as using WhatsApp."* Our USP: a stripped-down "Focus Realm Lite" that uses almost no data, bulk operations (mark attendance for 60 students in 10 seconds), and "parent delight" — an SMS/app notification that makes the school feel premium.

09

Clients, Partnerships & Traction

Where we actually stand today — named honestly, without overstating it.

NAME	PRODUCT	STATUS
Clarks Hotels & Resorts	Hospitality	Named traction / proof-point client. A formal proposal exists (18 June 2025, built on the now-legacy LMS framing — see Section 06). B2B outreach is active, including a meeting request to Clarks' Hotel HR Director for an MD-level demo.
The Hosteller	Hospitality	Named traction / proof-point client, referenced in earlier materials as part of a broader "Bespoke Learning Ecosystem."
JECRC University	Education	Named proposal — active, not yet a closed deal.

The broader education pipeline should be described as **active proposals, not closed wins** — be precise about this distinction in any external communication.

WHERE THINGS STAND HONESTLY

Focus Realm is pre-launch and bootstrapped, with no public funding announcement and no marquee customer case study locked in yet. That's exactly why the content and outreach strategy (Section 10) leads with industry expertise rather than a product pitch — we're building credibility before we ask anyone to buy.

10 How We Sell — GTM & Sales Methodology

The selling philosophy behind every deck, every demo, and every cold outreach message.

Consultative selling, not feature dumping

We sell using the **SPIN framework** — Situation, Problem, Implication, Need-Payoff. Reps are trained to diagnose the problem before prescribing a solution. We never lead with a feature list; we sell outcomes. To a hotel, that outcome is "**Audit Safety.**" To a school, it's "**Employability and Admin Efficiency.**"

Role-based pitching

Every demo is tailored to the person watching it — the Compliance Dashboard for an HR Director, the Core Academic Hub for a Dean. Nobody sees a generic walkthrough.

How the sales motion is actually structured

Per our operational philosophy (Section 03), Focus Realm's internal team does not run day-to-day sales. Go-to-market, lead generation, pitching, and deal closure are run by dedicated external partners who own the full sales cycle — more in Section 11. The internal team supplies the enablement layer:

- Pitch decks and case studies (e.g. The Hosteller)
- Demo environments
- Technical documentation

Once a deal closes, **fast-track implementation** kicks in — the internal tech team takes complete ownership of delivery immediately.

Current GTM activity

- **B2B outreach** is active — including direct outreach to Clarks Hotels' HR Director for an MD-level demo
- **A sales-outsourcing prospectus** exists for recruiting channel partners on a fully variable, commission-based model
- **PR & media outreach** runs off a large, tiered (Niche / Mid / Stretch) target list of outlets and podcasts, prioritizing accessible, boutique, and regional-language channels over prestige placements that require an established founder profile
- **A LinkedIn content pipeline** leads with industry expertise and thought leadership — the company name is deliberately withheld in early-funnel content, with the product reveal saved for later in the narrative arc
- **Internship recruiting** across Marketing, Business Development, and the Founder's Office — which is very possibly how you ended up reading this

TWO THINGS TO HOLD ONTO IN ANY CLIENT-FACING WORK

1. Financial figures and commission percentages are omitted from client-facing materials by default, to protect negotiating leverage.
2. Stay tightly scoped to what has actually been agreed or offered — no assumption-stacking about additional services, and no internal context (Section 11) bleeding into anything a client sees.

Our Partner Ecosystem

How Focus Realm actually gets built and sold, day to day — internal knowledge only.

CRITICAL RULE — READ BEFORE CONTINUING

Everything in this section is **internal-only**. **Legion** and **TDC** must never appear in any client-facing material — proposals, decks, emails to prospects, or demo scripts. This section exists purely so you understand how the company operates behind the scenes. If a client or prospect asks "who built this?" or "who's handling sales?", the answer is Focus Realm — full stop.

Legion — our external product & sales engine

Legion is Focus Realm's strategic external partner, acting as an autonomous engine for both **product development execution** and **sales**. Rather than a standard vendor, Legion is a deeply integrated partner that absorbs significant upfront risk in exchange for high-upside revenue share.

What Legion provides

- **Financial & technical engineering:** bears the end-to-end development cost (estimated at ₹20,00,000 in the original agreement), providing full-stack development, UI/UX execution, and QA, deployed on Focus Realm's own Google Cloud infrastructure
- **Sales execution:** acts as our primary external business development team — builds the pipeline, pitches prospects, and drives revenue

The deal structure — tiered revenue share

TIER	ACCUMULATED REVENUE BAND	LEGION'S SHARE
Tier 1	Up to 1x development cost (~₹20L)	60%
Tier 2	1–2.5x development cost	40%
Tier 3	2.5–5x development cost	25%
Tier 4	5–10x development cost	15%

By the time Tier 4 is reached, Legion hands over its sales conversion processes, frameworks, and training to Focus Realm's in-house team. After the final tier is surpassed, the tiered model dissolves entirely and Legion earns a flat **10% perpetual commission**

on Net Profit (not gross revenue) for the lifetime of the product. All brand assets, business IP, and client relationships remain solely Focus Realm's throughout.

Legion's people: Abhishek Patwa, **Gaurav Vyas** (the primary day-to-day point of contact — an external advisor owning positioning and GTM for the hospitality product), and Kartik Kannan. Legion's current scope is framed strictly as **inbound**, to avoid overlap with TDC's arrangement below.

TDC — technical & consulting partner

Role	Technical and consulting partner
Structure	Inbound lead conversion, 15% net revenue commission
Authorized signatory	Aditya Mishra, on Focus Realm's side
Scope discipline	Kept strictly separate from Legion's scope to avoid overlap or conflict

WHY THIS STRUCTURE EXISTS

It mirrors Section 03's philosophy exactly: Focus Realm's core team stays focused purely on product and delivery, while external, exclusive partners own the sales cycle end to end without being micromanaged. If your work touches partnerships, outreach, or GTM, understanding this split is what keeps you from accidentally working at cross-purposes with Legion or TDC.

12 Brand & Design System

What Focus Realm looks and sounds like — and a candid note on where the brand is still settling.

The current, active brand system

COLORS

Navy & Gold — the palette used for the hospitality product and current internal documents (including this one).

TYPEFACE

Inter (variable font) — used throughout this handbook.

Our taglines

Hospitality product tagline	"Every shift, five-star."
Company tagline	"Replacing Complexity with Clarity"
Older pitch deck tagline	"Empowering Our Future" (legacy)

A note on the logo

This is the original "FR" monogram, in the earlier blue color system, as it appears on the pitch deck and company dossier. It's a real, current company asset — but it belongs to an **older** brand system than the navy-and-gold direction now in use. No distinct logo has yet been confirmed for the hospitality product specifically, separate from the main company mark. If you need a current logo file for external use, confirm with Sehej or Ali before using this one — don't assume it's final.

BEING HONEST ABOUT THIS

There are two brand systems on record right now — the legacy blue system seen throughout older decks, and the navy/gold system used currently. Treat navy-and-gold-with-Inter as the standard for anything you produce today. If it matters for your specific project, flag the discrepancy to Sehej or Ali rather than guessing which one applies.

How We Work — Principles & Rules

The house rules. Read these twice — they'll save you a round of corrections on your first few pieces of work.

Working style — what to expect

- **Fast, directive, output-oriented.** Short prompts, and an expectation that you can pull from context without a re-brief every time.
- **Strong first drafts are expected immediately** — iteration happens through targeted corrections, not full rewrites from scratch.
- **Tone is conviction-led, emotionally charged, data-backed.** No hedging, no softened language.
- **Self-sufficiency is a hard requirement**, not a nice-to-have, for interns and early hires alike.
- **Documents for external audiences** should read clean, professional, and institutional. Internal work should be raw signal and distilled briefings — not transcript recaps.

Twelve rules to internalize

- ☐ **"Mise" is retired.** Never use it as a company or product name — historical reference only, and only when explicitly needed.
- ☐ **No LMS framing for hospitality** at any level of positioning, ever. (Education is the opposite — it's legitimately LMS-based, and that's fine there.)
- ☐ **Legion and TDC are internal-only.** Never name either partner, or any element of their deal structure, anywhere a client, prospect, or external party could see it.
- ☐ Commission percentages and other financial specifics are **omitted from client-facing materials by default**, to protect negotiating leverage.
- ☐ The **six hospitality pains** are the fixed GTM spine — use the exact names, don't rephrase them.
- ☐ The **Snowball / Disney narrative arc** (Status Quo → Impact Chain → The Wound → Resolution) is the approved framework for content campaigns.
- ☐ **Subtraction-first design** — build only the intersection of the committed feature list and the design-exploration superset, never the full superset.
- ☐ **No PMS integration** for hospitality at this stage — a deliberate foot-in-door strategy.
- ☐ **Education and hospitality language must never cross-contaminate** in client-facing materials — each vertical keeps its own vocabulary.
- ☐ **Prefer real, defensible statistics** in content — hotel turnover data, Cornell ADR data, the cited education stats — never fabricate figures.
- ☐ **Financial figures in proposals stay as placeholders** until explicitly confirmed by Sehej or Ali.
- ☐ **Fact-checking is a required step before delivery**, not optional.

The content narrative framework

Our flagship content approach (a 30-post LinkedIn campaign, three posts a week over ten weeks) follows a fixed narrative arc, sometimes called the **"Snowball / Disney" arc**:

Status Quo → Impact Chain → The Wound → Resolution — establish the world as it is, trace the chain of consequences, name the specific pain it causes, then reframe toward Focus Realm as the resolution. The company name is deliberately withheld until late in the arc.

SECTION 14

14 Tools & Resources We Use

The day-to-day stack — what it's for, and where to find it.

TOOL	WHAT IT'S FOR
Claude.ai	AI assistance for research, drafting, and analysis — used across the founding team
Google Workspace	Email and core productivity
Google Drive	File storage and sharing across the team
LinkedIn	Primary content and outreach channel
Excel / Google Sheets	Content calendars, expense tracking, feature-analysis workbooks
ZoomInfo, Apollo, Clay	Cold lead sourcing for sales outreach
WhatsApp Business	Staff communication channel — also relevant in-product, since real hotels currently run room/floor allotment manually over WhatsApp
Lovable	Used to build the company website

A LIVE OPEN ITEM YOU MAY END UP HELPING WITH

The hotel landing page on the website needs a rebuild — internally, the school/education page is currently outranking the hospitality page, which isn't the intended balance given hospitality is the primary active product.

15 Glossary of Terms

Quick definitions for the shorthand you'll hear in your first week.

SOP

Standard Operating Procedure — in our product, it lives inside a timed task rather than a document.

Service Execution Platform

Our working category name for Focus Realm Hospitality — "the operating system for hotel service standards."

Three-Role Architecture

The Staff / Manager / Author structure that organizes the hospitality product.

Six-Pain Narrative

Our locked GTM spine for hospitality: Supervisor Bottleneck → Ghost SOP → Invisible Performance Gap → Attrition Bleed → Star Rating Ceiling → Audit Ambush.

Strategic Minimalism

Our core product philosophy — build only what the client actually needs, in direct opposition to "Feature Dumping."

Subtraction-First Design

Aditya's engineering principle — ship the intersection of committed features and design exploration, never the full superset.

ICP

Ideal Customer Profile — the specific buyer and account profile we target in each vertical (Section 08).

SQL

Sales Qualified Lead — the core deliverable expected from Business Development interns.

GTM

Go-To-Market — our overall strategy for reaching and winning customers.

SPIN

Situation, Problem, Implication, Need-Payoff — the consultative sales framework we use.

PMS

Property Management System — the hotel software category we deliberately do not integrate with yet.

MOU

Memorandum of Understanding — the preliminary agreement structure used with partners like Legion, ahead of a definitive contract.

LMS

Learning Management System — the category we explicitly avoid being framed as for hospitality, and legitimately are for education.

"Mise"

A retired internal prototype codename. Never use it as a product or company name.

Snowball / Disney Arc

Our approved content narrative structure: Status Quo → Impact Chain → The Wound → Resolution.

REMEMBER

Section 11 (Legion & TDC) is confidential. Financial figures stay as placeholders until Sehej or Ali confirm them. When in doubt about what's safe to share externally — ask first.

17 Closing Note

You're joining Focus Realm at a genuinely early moment — pre-revenue, pre-launch, with two real products and a small team that moves fast and expects the people around it to move fast too. That's exactly what makes the next few months worth paying attention to.

You now have the same grounding context the founding team works from: what we believe about learning technology, what we've built, who we're building it for, and how we talk about it. Use it. Refer back to it. And when something changes — because at this stage, things will — ask rather than assume.

WELCOME ABOARD.

Every shift, five-star — starting with yours.
